

1. CORE PRODUCT PRINCIPLE

OpenClub is a venue operating system for nightlife that combines:

- Section reservations (high-ticket revenue)
- General admission tickets (volume traffic)
- Guest list and CRM (customer retention)
- Referral system (distributed sales)
- Event control delegation (club and promoter structure)

2. SYSTEM ARCHITECTURE

Venue (infrastructure)

- Night (default rules)
- Event (optional override layer)
- Sections (fixed inventory)
- Packages and pricing
- General admission tickets
- Guest list
- CRM (customer intelligence)
- Referrals (attribution layer)

Club Owner/Mgmt Onboarding

1. Landing Page Goal: get them in fast. Primary actions • Log In • Create Account CTA: Create Account	
2. Role Selection Screen Title How will you use OpenClub? Options • Club Management • Promoter • Host User selects: Club Management	

3. Account Setup (3-Step Flow) Step 1 — Personal Information Purpose: create the user identity. Fields: • First Name • Last Name • Email • Phone Number • Password CTA: Continue Step 2 — Venue Information Purpose: create the venue object Fields: • Club / Venue Name • Venue Type (Nightclub, Lounge, Bar + Lounge, Event Venue) • Address • City • State • ZIP • Business Phone Number Required Branding • Venue Logo (required) • Venue Cover Image (required) • Instagram handle CTA: Continue Step 3 — Operating Details Purpose: define how the venue operates (minimum viable inputs only) Hours of Operation (this is crucial for events) Weekly selector Service Toggles • Bottle Service Available • Hookah Available • Food Available • Valet Available Entry Basics • Walk-ins Allowed (Yes/No) • Age Policy (18+ / 21+)	

CTA: Create Venue	
PHASE 2 — Venue Setup Immediately after account creation. 4. Map Your Floor Goal: create spatial structure of the venue Step 4A — Define Floors Prompt: How many levels does your venue have? Options: • 1 • 2 • 3 • Custom Step 4B — Name Floors Examples: • Main Floor • VIP Balcony • Rooftop Step 4C — Layout Builder (Per Floor) Canvas + drag/drop system Elements: Reservable • Sections (blue) Fixed • Bar • DJ Booth • Bathroom • Patio • Entry • Stage • Walls Each section requires: • Section Name • Capacity CTA: Continue	
5. Create Section Packages Goal: define what customers are buying Starter Templates (editable)	

• Silver • Gold • VIP Package Fields • Package Name • Max Guests • Booking Fee • Minimum Spend • Bottle count CTA: Continue	
6. Assign Packages to Sections Goal: connect pricing to physical layout Example: Section A1 → Silver, Gold Section VIP2 → Gold, VIP This creates: Section → Package relationship CTA: Continue	
7. Invite Your Team Goal: attach staff to venue Roles: • Host • Bottle Personnel • Door Staff • Other Club Managers Invite via: • Phone • Invite Link / Code Promoters are not required here (handled later via events) CTA: Continue	
PHASE 3 — Completion 8. Setup Complete Screen	

Message: Your venue is live on OpenClub You can now: • Accept reservations • Manage your floor • Assign staff • Create events CTA: Go to Dashboard	
PHASE 4 — Club Dashboard (First Entry) Dashboard = Operational Command Center Top Summary Cards • Tonight's Reservations • Active Sections • Staff Assigned • Upcoming Events Core Modules • Floor Map • Reservations • Sections • Packages • Team • Events • Promoters • Settings First-Time Empty State Message: You're ready to start taking reservations Suggested actions: • Preview your venue page • Create your first event • Assign tonight's staff	

CLUB OWNER/MGMT DASHBOARD

Core Purpose

The Club Owner / Management Dashboard is a desktop, laptop, and tablet operations dashboard for managing nightly venue activity.

The dashboard should answer three questions immediately:

1. What is happening tonight?
2. Which section time slots are still open?
3. What action should management take right now?

The dashboard should function as a nightlife operations command center.

GLOBAL STRUCTURE

Primary Navigation

The dashboard has four primary tabs:

1. Home
2. Events
3. Guests
4. Account / Settings

There is no separate Floor tab.
Floor management is part of Home.

Persistent Top Right “+” Button

The “+” button must remain accessible from the dashboard.

Actions

- Create Event
- Send Offer
- Add Reservation

- Import Guests
-

1. HOME TAB

Purpose

The Home tab is the primary real-time operations dashboard.

Home contains only:

1. Top KPI Strip
2. Floor Map with Map/Grid Toggle
3. Bottom Section Detail / Reservation Timeline Panel
4. Right Side My To Do List

Events do not live on the Home dashboard. Events live in the Events tab.

TOP KPI STRIP

The KPI strip contains exactly three KPIs.

KPI 1 — Tonight's Revenue Projection

Displays

Tonight's Revenue Projection =

- Booking Fees
- Section Minimum Spend
- General Admission Revenue

Interaction

Clicking the KPI opens a Revenue Breakdown Panel.

Revenue Breakdown Panel

- Booking Fees — \$XX
 - Section Minimum Spend — \$XX
 - GA Revenue — \$XX
 - Tonight's Total Projected Revenue — \$XX
-

KPI 2 — Sections Booked

Displays

Total booked section time slots for the selected day/event.

Example:

18 Section Bookings Tonight

Rules

This KPI must only represent booked section reservations.

It must not include:

- total sections
- available sections
- open time slots

Interaction

Clicking the KPI opens the Section Activity Sheet.

Section Activity Sheet

Purpose

Shows booked section reservations for the selected day/event.

Table Columns

- Section
- Time Slot
- Booker
- Party Size
- Package

- Status

Example Rows

B2 — 9PM–11PM — Ashley — 8 Guests — Gold — Paid

VIP 1 — 11PM–2AM — Marcus — 10 Guests — Platinum — Pending

A4 — 10PM–12AM — Chris — 6 Guests — Silver — Paid

Row Actions

- Call Booker
- Message Booker
- View Details

Push notification logic, templates, and behavior must match the mobile app.

KPI 3 — General Admission + Venue Capacity

Displays

GA Passes Sold + Venue Capacity %

Example:

117 GA Sold • 72% Capacity

Interaction

Clicking the KPI opens the GA + Capacity Breakdown Panel.

GA + Capacity Breakdown Panel

Displays:

- Total GA Passes Sold
- Ticket Tier Breakdown
- Remaining Capacity
- GA Redeemed
- Section Guest Count

- Venue Capacity %

Example

Free RSVP — 80 Claimed
Early Bird — \$10 — 40 Sold
General Admission — \$20 — 30 Sold

GA Redeemed — 95
Section Guest Count — 74
Venue Capacity — 72%

CENTER FLOOR MAP

Purpose

The Floor Map is the primary visual system for section health and section time slot availability.

Floor View Toggle

The user can switch between:

- Map View
 - Grid View
-

Map View

Default view.

Displays top-down venue layout from onboarding.

Section Color Logic

Blue → Has Available/Open Time Slots
Orange → Reserved / Pending

Green → Active / Seated
Grey → Fully Booked

Section Interaction

When management clicks a section, a bottom-side detail panel opens.

The bottom panel becomes the Reservation Horizontal Timeline for the selected section.

The section detail panel must not open on the right side.

The right side is reserved for My To Do List.

Bottom Section Detail / Reservation Timeline Panel

Purpose

Shows the selected section's time slots in a horizontal reservation timeline.

Display Rule

Open time slots must appear first.

Booked/reserved time slots appear after and are greyed out.

Example — Section B2

Open Time Slots

9PM–10PM — Available

1AM–2AM — Available

Booked / Reserved

10PM–1AM — Ashley — Gold Package

Open Time Slot Actions

- Adjust Pricing
 - Send Offer
 - Highlight Availability
-

Booked Time Slot Actions

- Call Booker
 - Message Booker
 - View Details
-

Grid View

Grid View is for operators who prefer table scanning.

Table Columns

- Section
- Time Slot
- Status
- Booker
- Package
- Action

Clicking a row opens the same bottom-side Reservation Timeline Panel.

Revenue Loss Highlighting

V1 revenue-loss logic only needs to highlight unsold section time slots.

The system should not include advanced analytics such as:

- low-performing analysis
- VIP underperformance logic
- dead inventory analysis
- optimization scoring

The operational goal is to show whether all section time slots are taken.

If a section has open time slots, those slots must be visually brought forward so management can take action.

RIGHT SIDE PANEL — MY TO DO LIST

Purpose

My To Do List drives:

- revenue actions
- CRM outreach
- promoter approvals
- operational tasks

This is the desktop equivalent of the mobile My To Do List.

Push notification logic must be the same between dashboard and mobile app.

Card Structure

Each card includes:

- Problem Statement
 - Suggested Action
 - Push Notification Preview
 - Quick Actions
-

Desktop Visibility Rule

Desktop can show up to 7 visible cards.

Additional cards scroll vertically.

Action Category 1 — Revenue Opportunities

Example

Problem:

4 section time slots still open tonight

Suggested Action:

Send push notification to selected guest segment

Push Notification Preview:

"Last-minute VIP sections available tonight — reserve now"

Actions:

- Accept
 - Modify
 - Dismiss
-

Example 2

Problem:

3 days until Sekai x The Collective

Suggested Action:

Send event push notification

Push Notification Preview:

"Sekai x Collective this Friday — reserve your section early"

Actions:

- Accept
- Modify

- Dismiss
-

Action Category 2 — CRM Actions

CRM recommendations should live inside My To Do List.

Example

Problem:

12 favorites inactive for 30 days

Suggested Action:

Send VIP incentive

Push Notification Preview:

“VIP sections available this weekend — enjoy 15% off”

Actions:

- Accept
 - Modify
 - Dismiss
-

Example 2

Problem:

86 new guests this week

Suggested Action:

Invite to upcoming event

Push Notification Preview:

“Join us for Sekai x The Collective this weekend! Reserve your section or GA pass now.”

Actions:

- Accept
 - Modify
 - Dismiss
-

Action Category 3 — Promoter Requests

Actions:

- View
 - Accept
 - Modify
 - Decline
-

2. EVENTS TAB

Purpose

The Events tab is the dedicated event management page.

It supports:

- event cards
 - event creation
 - event controls
 - section visibility
 - GA visibility
 - referral activation
 - approval workflows
-

Event Categories

Tabs:

- Tonight
 - Upcoming
 - Past
-

Event Cards

Each event or regular club night appears as a card.

Event Card Displays

- Event Name
- Date
- Time
- Status
- Promoter
- Sections Booked
- GA Passes Sold

Example

Sekai x The Collective
Friday • 9PM–2AM
Status: Live
Promoter: The Collective
Sections Booked: 8
GA Passes Sold: 117

Regular Club Night Logic

If sections are booked or GA passes are acquired on a normal night without a formal event, the system automatically creates a Regular Club Night.

This prevents:

- orphan bookings
 - hidden section activity
 - hidden GA activity
 - bookings without an operational container
-

Expandable Event Card

Each event card expands into full event activity.

Section 1 — View Sections

Sections are primary and appear first.

Displays:

- Section Name
- Time Slot
- Booker Name
- Party Size
- Package
- Booking Fee Status
- Minimum Spend

Section Actions

- Call Booker
 - Message Booker
 - View Details
 - Adjust Pricing where applicable
-

Section 2 — View GA Passes

GA is secondary and appears below sections.

Displays:

- Total Tickets Sold
- Revenue Generated
- Remaining Capacity
- Ticket Type Breakdown

Ticket Type Breakdown

- Ticket Name
- Price
- Quantity Sold

GA Actions

- View Buyers
 - Send Push to Ticket Holders
 - Expand GA Buyers
-

EVENT CREATION SYSTEM

Core Principle

An event is an operational overlay on top of a venue's default night.

Hierarchy:

Venue

→ Night

→ Event

→ Sections

→ Pricing / Staffing / Controls

Event Status Flow

- Draft
 - Pending Approval
 - Approved
 - Live
 - Completed
 - Cancelled
-

Entry Points

Event creation can start from:

- Dashboard "+" Button
 - Events Tab
 - Event Management Page
-

Step 1 — Basic Event Info

Goal

Define the identity of the event.

Fields

- Event Name
- Event Type
- Date
- Start Time
- End Time
- Event Description
- Event Cover Image

Event Type Options

- Club Night
- Promoter Event
- Artist / Headliner
- Private Event
- Day Party

Step 2 — Event Ownership & Participants

Goal

Define who is involved.

Fields

Event Created By
Auto-filled as Club or Promoter.

Add Promoter(s):

- Search existing promoters
 - Invite new promoter
-

Step 3 — Event Operations Control

Purpose

Define which party controls each operational component of the event.

Each operational component supports:

- Club
 - Promoter
-

Control Categories

Deposit Fee

Deposit fee control must work both ways.

Scenario 1:

Promoter books a venue night and pays the club deposit.

Scenario 2:

Club requests a promoter or promotion group for a specific night and pays the promoter deposit.

Deposit Payment Rule

If either side owes a deposit, the deposit must be paid through the app before the event goes live.

The owed party receives the deposit.

Platform fee applies.

Section Fees, Pricing & Availability

Controlled by:

- Club
- Promoter

Whoever controls this category can manage pricing and availability for the event.

Bottle Personnel Management

Controlled by:

- Club
 - Promoter
-

Door Personnel Management

Controlled by:

- Club
 - Promoter
-

Bottle Inventory Supply

Controlled by:

- Club
 - Promoter
-

Dynamic Pricing Authority

Dynamic pricing does not need to be a separate control.

It is included under:

Section Fees, Pricing & Availability

UX Requirement

Each control toggle must include:

- “?” tooltip
- short explanation text

Tooltip copy can be added later.

Step 4 — Section & Inventory Configuration

Goal

Define what is available for the event.

Core Rule

Whoever controls the event can control sections during the event window.

The controlling party can manage:

- pricing
- minimums
- availability
- section allocations

The club retains final venue authority.

Promoter Can

- Modify section pricing
- Modify section minimums
- Enable/disable section availability
- Allocate sections
- Reserve sections

Promoter Cannot

- Create new sections
 - Delete sections
 - Modify club floor map
 - Change venue infrastructure
-

Section Availability

Default:

All sections available.

Allowed actions:

- Enable specific sections
 - Disable specific sections
 - Block sections
 - Reserve sections
-

Section Allocation

If promoter exists, sections can be allocated.

Example:

A1–A6 → Promoter
VIP Sections → Club

Constraint

Sections cannot be created or deleted during event setup.

Sections can only be controlled.

Step 5 — Pricing & Packages

Core Principle

Pricing must be:

- tier-based
- reusable
- overrideable per event
- fast to edit

Manual re-entry should be avoided.

Pricing Model Structure

Each Section Tier has:

- Section Booking Fee
 - Section Minimum Spend
 - Bottle Package
-

Example Tiers

- Silver
 - Gold
 - VIP
-

Event Pricing Screen

Section Title:

Event Section Pricing

Editable Pricing Per Tier

Silver Section:

- Section Booking Fee
- Section Minimum Spend
- Bottle Package

Gold Section:

- Section Booking Fee
- Section Minimum Spend
- Bottle Package

VIP Section:

- Section Booking Fee
 - Section Minimum Spend
 - Bottle Package
-

Pricing UX Rule

Each tier row must support:

- Inline edit
 - Expand for details
 - Apply to all sections in tier automatically
-

Saved Pricing Profiles

Sources

1. Club Default Pricing Profiles
 2. Promoter Pricing Profiles
-

Club Default Pricing Profiles

Saved during onboarding/settings.

Examples:

- Template Silver Pricing
 - Template Gold Pricing
 - Template Day Party Pricing
-

Promoter Pricing Profiles

Each promoter can have saved profiles.

Examples:

- Standard Silver Pricing
 - The Collective x Sekai Gold Pricing
-

Pricing Profile Panel

Section Title:

Saved Pricing Profiles

Example Card

Club Default — Friday Night

Silver: \$250 / \$500 min

Gold: \$400 / \$800 min

[Apply]

Interaction

Click → Apply all tiers

Drag → Drop into pricing panel

Override Logic

When a profile is applied:

- all tier fields populate
 - user can edit values
 - system marks “Custom Overrides Active”
-

Bottle Package Structure

Bottle package must not be a free text field.

Bottle Package Fields

- Number of Bottles
- Add-ons
- Celebration Sign
- Package Tier

Example Packages

- Standard 2 Bottle Package
- 3 Bottles Premium
- 4 Bottles + Celebration

Bottle package data is required for bottle personnel and service preparation.

General Admission Setup

GA Ticket Types

Each event can have multiple ticket tiers.

Examples:

- Free RSVP

- Early Bird
 - General Admission
 - VIP Entry
-

Ticket Type Fields

- Ticket Name
 - Price
 - Quantity Limit
 - Entry Rules
 - Time Restrictions
-

Entry Rules

Examples:

- Free before 11PM
 - Valid all night
 - Entry before 10:30PM required
 - Female Free / Male Paid
-

Pricing Logic

Free tickets are used for:

- guest list expansion
- promoter traffic
- low-friction attendance

Paid tickets are used for:

- guaranteed entry
 - revenue
 - high-demand nights
-

Tiered Pricing Example

Early Bird — \$10
GA — \$20
Late Entry — \$30

Inventory Control

Each ticket type can be:

- Unlimited
- Capped

Example:

200 ticket cap

Visibility Rules

- Public
 - Private
 - Promoter-only
-

REFERRAL SYSTEM ARCHITECTURE

Core Principle

Each eligible user should have:

1 persistent foundational referral link
AND
optional event-specific referral links.

Users should not receive a brand-new foundational link every night.

Foundational Referral Link

Every eligible user receives one persistent referral link tied to their profile.

Eligible roles include:

- Promoter
 - Bottle Personnel
 - Club Management
 - Other approved referral-enabled roles
-

Example Foundational Links

openclub.com/marcus

openclub.com/ashleyvip

openclub.com/sekai-hosting

Foundational Referral Link Behavior

Clicking the foundational referral link takes the customer to that person's profile page.

The profile page acts as a centralized referral hub showing:

- regular section availability
- regular GA passes
- active events
- upcoming events
- available reservations tied to that user
- event-specific booking opportunities

The foundational link should always maintain referral attribution for the associated user.

Foundational Referral Attribution Logic

If a customer enters through a foundational referral link and later:

- books a section
- purchases a GA pass
- joins a guest list
- enters a specific event

the original referral owner receives attribution.

This applies even if the customer navigates deeper into a specific event after entering from the foundational profile link.

Event-Specific Referral Links

Users only receive event-specific referral links for events they are attached to.

Examples:

- assigned promoter
 - assigned bottle personnel
 - approved venue representative
 - attached management role
-

Example Event-Specific Link

openclub.com/sekai/friday-night/marcus

Event-Specific Link Behavior

When customer enters through an event-specific link:

- event is preselected
 - referral owner is preselected
 - attribution is locked to that user
 - customer lands directly into that event experience
-

Relationship Between Foundational + Event-Specific Links

The foundational referral link acts as the user's permanent referral identity.

Event-specific links are optional deep-linked versions tied to specific events.

Both referral systems must maintain attribution consistently.

Example Attribution Flow

Customer clicks:

openclub.com/marcus

Customer views:

- Marcus profile page
- Friday event
- available sections

Customer books:

VIP Section for Friday event

System attribution:

Marcus receives referral attribution.

Example Event-Specific Attribution Flow

Customer clicks:

openclub.com/sekai/friday-night/marcus

Customer lands directly inside Friday event.

Customer books:

GA pass

System attribution:

Marcus receives referral attribution.

Referral Attribution Coverage

Attribution applies to:

- section bookings
 - GA ticket purchases
 - guest list joins
 - regular nights
 - event nights
-

Stored Attribution Data

- referrer_user_id
 - referrer_role
 - event_id (if applicable)
 - session_id
 - conversion_type
 - referral_source_type
 - foundational
 - event-specific
-

Customer Experience From Referral Links

Foundational Link Landing

Profile page displays:

Primary

- Active Events
- Available Sections
- Featured Reservations
- Regular Nights

Secondary

- GA Passes
 - Guest List Opportunities
-

Event-Specific Link Landing

Customer lands directly inside:

- Event Page
 - Event Sections
 - Event GA
 - Event Reservation Flow
-

Attribution Persistence

Once attribution begins from either:

- foundational referral link
- event-specific referral link

the referral owner remains attached throughout the booking session unless manually overridden by platform rules.

No-Link Scenario

If customer enters organically with no referral attached, checkout prompts:

“Who are you booking through?”

Options:

- Promoter
 - Bottle Personnel
 - None
-

Commission Logic

Same attribution applies to:

- section booking fees
- GA revenue
- referral conversions

Example:

Booking Fee = \$100

Marcus Commission = 60%

GA Ticket = \$20

Marcus receives configured percentage.

Event Go-Live System

Purpose

Define which team members and groups receive:

- event access
- referral links
- attribution eligibility

- event visibility

This is marketing and booking activation.

This is not section or floor assignment.

Trigger

Activates only when event status changes to:

Live / Public

Go-Live Activation

Customer Side

- Event visible
- Sections bookable
- GA bookable
- Referral attribution visible

Club Management Group

If applicable:

- Event appears in dashboard
- Referral links active
- Share tools available

Promoter Management Group

If applicable:

- Event appears in dashboard
- Referral links active
- Attribution begins

Bottle Personnel

If applicable:

- Event appears in dashboard
- Referral link active

- Can begin sharing immediately

Hosts

- Event appears in operational dashboard
- No referral activation unless configured

Door Personnel

- Event appears only if needed operationally
 - No referral activation needed
-

3. GUESTS TAB

Purpose

Guests tab is the V1 guest list and lightweight CRM system.

It prioritizes:

- fast guest lookup
 - segmentation
 - push notifications
 - guest list management
-

Top Toggle

- Event Guests
 - All Guests
-

Event Guests View

Tied to a specific event.

Displays:

- Section bookings
- GA ticket holders

- Total guests

Click/tap opens full guest list.

All Guests CRM View

CRM Table Columns

- Name
- Phone Number
- Tags
- Favorite
- Actions

Do not include:

- spend tracking
 - visit tracking
 - advanced analytics
-

CRM Filters

- New
- Active
- Inactive
- Favorites

Inactive supports:

- 14 days
 - 30 days
 - 60 days
-

CRM Actions

- Send Push Notification
- Add to Guest List

- Tag Guest
 - Mark Favorite
-

Push Notification Templates

- Event Invite
 - Reactivation
 - Promotion
 - Availability
 - GA Push
-

Push Notification UX Rule

Bulk sending must minimize manual workload.

Flow:

Audience Segment

- Event
 - Template
 - Preview
 - Send
-

4. ACCOUNT / SETTINGS TAB

Purpose

Manage:

- venue operations
- payments
- team
- pricing profiles
- commissions

- venue configuration
-

Payments

Displays:

- Booking Fees
 - GA Revenue
 - Referral Earnings
 - Payouts
-

Team

Tabs:

- Club Management
 - Bottle Personnel
 - Host
 - Door
 - Promoters
-

Add Member

Input:

- Phone Number
- Role

System generates SMS invite link/code.

Venue Settings

Includes:

- Venue Info
 - Default Pricing Profiles
 - Commission Settings
 - Payment Settings
 - Team Permissions
-

Final Dashboard Structure

Home

Top:

- 3 KPIs

Center:

- Floor Map with Map/Grid Toggle

CLUB MGMT MOBILE APP

GLOBAL MOBILE STRUCTURE Top Right (Persistent on Home screen) “+” Button Options: • Create Event • Send Offer • Add Reservation • Import Guests Bottom Navigation (5 Tabs) • Home • Floor • Events • Guests • Account	
1. HOME TAB (PRIMARY DASHBOARD) Purpose: Real-time revenue visibility, decision-making, and action execution	

KPI SECTION

KPI 1 — Tonight's Revenue Projection

Displays: Tonight revenue projection = That specific night's
Booking fees + Section minimum spend + general
admission tickets

Tap > If tonight revenue projection is selected it shows
breakdown of all

- Booking Fees \$XX
- Section Minimum Spend \$XX
- GA Revenue \$XX

Tonight's Total Projected Revenue = \$XX

KPI 2 — Sections Booked

Displays: Total number of booked sections for that night
(no percentage)

Tap → Opens Section Activity Sheet

Table:

- Section
- Time
- Booker
- Party Size
- Package

Actions per row:

- Call
- Message
- [push notifications via app]
- View Details

My To Do List Section

Purpose:

Drive revenue and engagement through quick decisions

Structure per Card

- Problem statement
- Suggested action
- Pre-configured push notification
- Action buttons

Action Categories

Revenue Opportunities

Examples:

- 4 sections still open → drop price + send push
- 3 days until event → send promotion
- VIP sections underperforming → highlight availability

Example 1 (Revenue opportunities)

[Problem] 4 sections still open

[Action] Drop from \$600 → \$450 + notify guests?

[Notification Preview]

“Last-minute VIP sections available tonight — reserve now”

[Action Buttons] [Accept] [Modify] [Dismiss]

Example 2 (Revenue opportunities)

[Problem] 3 days until [insert club/promoter event]

[Action] Send event push?

[Notification Preview] “Sekai x Collective this Friday — reserve your section early”

[Action Buttons] [Accept] [Modify] [Dismiss]

CRM Actions

Examples:

- 12 favorites inactive → send VIP offer
- 86 new guests → invite to upcoming event
- 28 inactive guests → send GA push

Example 1 CRM Actions

[Problem] 12 favorites inactive (30 days)

[Action]: Send VIP incentive

[Notification Preview] “VIP sections available this weekend — enjoy 15% off”

[Action Buttons] [Accept] [Modify] [Dismiss]

Example 2 CRM Actions

[Problem] 86 new guests this week

[Action] Invite all upcoming event [insert upcoming club owner event]

[Notification push] Join us for the [event title] this weekend! Get your section or GA pass asap, see you there”

[Action Buttons] [Accept] [Modify] [Dismiss]

3. Promoter Requests

- View
- Accept
- Modify
- Decline

Rules

- 1–2 tap execution
- Dismissible
- Prioritized
- Max 3, rest in a vertical scroll view
- Must include clear next step
- Must show push notification preview

2. FLOOR TAB

Purpose:

Visualize section availability and act on open inventory

View Toggle

- Map View
 - Grid View
-

Map View

Tap a section → opens bottom horizontal panel

Bottom Panel (Section Detail)

Displays:

Section Name (Example: B2)

Time Slots:

- 2PM–7PM (Day Party)
- 9PM–12AM (Booked)
- 1AM–2AM (Open)

Each slot shows:

- Booker name
- Party size
- Package

Grid View

Table format:

- Section
- Time
- Status
- Booker

Tap row → opens same bottom panel

Actions per Slot

- Call Booker
- Message Booker [Pre-config push notifications]
- Adjust Pricing [For open sections, not booked or pending]
- Send Offer [Section B2 is available at 9pm!] able to send push notification offer to selected guests

Rules

- Unbooked/available section timeslots must be highlighted or attention brought to (loss revenue)

3. 3. EVENTS TAB

Purpose

View and manage all **event-based nights and regular club nights**, including:

- Section bookings
- General admission (GA) tickets
- Event performance

Event Categories

Tabs:

- Tonight

- Upcoming
- Past

Event Cards

Each event or regular club night appears as a card.

Event Card displays:

- Event Name (or “Regular Club Night - Monday”)
- Date
- Time
- Status (Live / Scheduled / Completed)
- Promoter (if applicable)
- Sections Booked (#)
- GA Tickets Sold (#)

Examples:

[Event card] Sekai x The Collective

Friday, 9PM–2AM

Status: Live

Promoter: The Collective

Sections Booked: 8

GA passes sold: 117

[Regular club night card] Regular Club Night

Saturday, 9PM–2AM

Status: Live

Sections Booked: 4

GA passes sold: 87

Regular Club Night Logic

If sections are booked or GA passes acquired on a normal night without a specific created event, the system automatically creates a:

Regular Club Night card.

This prevents booked sections from feeling “eventless” or hidden.

Expandable Event Card (Dropdown)

Each event card has a dropdown:

Tap → expands full event activity

Section 1 — Sections (Primary)

Title: **View Sections**

Displays all sections tied to that event or club night.

Section Row Includes

- Section Name
 - Time Slot
 - Booker Name
 - Party Size
 - Package
 - Booking Fee Status (Paid / Pending)
 - Minimum Spend
-

Example

B2 — 9:30PM — Frank — 8 guests — Gold — Paid — \$2,000 min

VIP 1 — 11PM — Ashley — 10 guests — Platinum — Pending — \$4,000 min

Section Actions

- Call Booker
- Message Booker [Pre-config push notification]
- View Details
- Adjust Pricing

Section 2 — General Admission (Secondary)

Title: **View GA Passes**

Appears directly below Sections.

GA Ticket Summary

- Total Tickets Sold
- Revenue Generated
- Remaining Capacity (if capped)

Ticket Type Breakdown

Each GA tier is listed:

- Ticket Name
 - Price
 - Quantity Sold
-

Example

Free RSVP — 80 claimed
Early Bird — \$10 — 40 sold
General Admission — \$20 — 30 sold

GA Actions

- View Buyers
- Send Push to Ticket Holders

Expand GA Buyers

Tap ticket type → shows list:

- Name
- Referrer (if applicable)
- Status (Arrived / Not Arrived)

Key Behavioral Rule

Sections are always displayed **first**
GA passes are always displayed **second**

This ensures:

- High-ticket revenue is prioritized

• GA acts as supporting traffic layer Actions (Top Level) Each event card supports: • View Event • Share Event • View Controls Regular Club Night Behavior If no formal event exists: System automatically creates: Regular Club Night Includes: • Sections • GA passes • Same dropdown structure System Constraint Every booking must belong to: • An event - OR • A regular club night No orphan bookings allowed. UX Rules • Expand/collapse must be fast • No heavy navigation required • Data visible in 1–2 taps • Sections and GA clearly separated	
4. GUESTS TAB	

Purpose:
Combine guest list + CRM

Top Toggle

- Event Guests
- All Guests

Event Guests View (tied to a specific event)

Displays:

- Section bookings
- GA ticket holders
- Total guests

Tap → view full guest list
