CUSTOMER MOBILE APP

OpenClub — Customer Mobile App V1

Core Product Requirements

Customer signup and account creation must be:

- Fast
- Frictionless
- Low commitment
- Minimal effort

The customer should be able to immediately browse nightlife inventory before account creation.

Primary product goal:

Get customers into the product and viewing nightlife inventory as quickly as possible.

Account creation should only become required when the customer attempts to:

- Purchase a GA pass
- Join a guest list
- Book a section
- Accept a section invite
- Save/follow content
- Interact socially

Initial Landing Experience

First Screen

OpenClub Logo

Primary Actions:

Sign Up

Log In

Secondary CTA:

Browse Selections

Browse Selections Mode

If customer selects Browse Selections:

Allow immediate access into the app without account creation.

Customer can:

Browse events

Browse sections

View nightlife inventory

View event details

View pricing

View clubs/promoters

The app should automatically:

Detect customer city OR ask for city selection.

No signup required during browse-only mode.

Account Creation Trigger Logic

Account creation is triggered only when customer attempts to:

Purchase GA pass

Join guest list

Book section

Accept section invite

Save/follow content

Use social functionality

This should trigger lightweight onboarding/account creation flow.

Bottom Navigation

Home
Sections
My Events
Friends
Profile

Tab 1 — Home

Purpose

Primary nightlife discovery feed.

Supports:

Event discovery
Social proof
Urgency
GA pass conversion
Section conversion
Nightlife browsing

Top Navigation Area

Top Left:

City Selector
Date Selector

Examples:

Houston

Tonight
This Weekend
Custom Date

Top Right:

Search Icon

Search supports:

Events
Clubs
Promoters
Users/Friends

Home Feed Categories

For You

Subtitle:

Curated experiences hand-picked for you

Logic:

Followed clubs
Followed promoters
Nightlife preferences
Attendance history
Friends attending

Trending

Subtitle:

Here's what's gaining traction in your area

Logic:

RSVP growth
Section booking velocity
Shares
Recent follows

Recent engagement

Weekend Vibes

Subtitle:

Everything happening this weekend

Logic:

Chronological + trending blend

Experiences

Subtitle:

Immerse yourself in something new

Examples:

Rooftop parties

Lounges

Day parties

Upscale nightlife

After-hours

Warehouse events

Discover

Subtitle:

Go outside your comfort zone

Purpose:

Surface nightlife experiences outside customer's normal patterns.

Home Event Card

Each event card displays:

Event cover image
Event name
Event date
Event time (timezone specific)
Event location
Social proof
Trending/urgency indicators

Social Proof — See Who's Going

Each event can display up to 30 attendees.

Hierarchy order:

Friends
Following
Random attendees until 30-person limit reached

Examples:

3 friends going
+27 others attending

Ashley M, Chris D, Tony R
+27 others going

Do not display full attendee lists publicly.

Trending / Urgency Indicators

Examples:

Trending Up

50+ RSVPs in last 24 hours

Almost Full
2 sections remaining

Guest List Closing Soon

VIP Tables Selling Fast

Event Detail Screen / Modal

Selecting an event card opens a dedicated event detail screen or modal.

Event Detail Screen Content

Event cover image
Event name
Date and time (timezone specific)
Google Maps integration
See Who's Going
GA / digital pass area
Section inventory
Save event
Share event
Follow promoter or club

Google Maps Integration

Location area should contain:

Google Maps snapshot preview
Clickable map integration

Customer can:

Open directions
Launch Google Maps

View venue location directly from event detail screen

See Who's Going

Display:

Maximum 30 attendees.

Hierarchy:

Friends

Following

Random attendees until limit reached

GA / Digital Pass Area

Pass inventory is dynamic.

Promoter or club can choose:

One pass type

Multiple pass types

All pass types

UI must dynamically render correctly for all scenarios.

Pass Type Examples

Free GA

General Admission

VIP Admission

Early Bird

Ladies Free Before 11PM

Tiered Pricing Passes

Pass Display Requirements

Always prioritize displaying:

Free GA when available.

Each pass displays:

Pass name

Price

Entry restrictions

Time restrictions

Availability if applicable

CTA:

Get Pass

Join Guest List

Purchase Pass

Revenue Logic — GA Passes & Sections

Revenue routes foundationally to:

Event owner OR club owner depending on ownership structure.

Applicable percentage distributions are subtracted automatically.

Revenue Split Logic

Applicable participants:

Club management

Promoter

Bottle personnel

Platform fee:

15% platform fee always applied to all transactions.

Section Inventory Area

Section inventory lives inside event detail screen.

Section Inventory Display

Each section displays:

Section name
Booking fee
Minimum spend
Guest capacity
Bottle package
Arrival requirements
Section availability

CTA:

Book Section

Tab 2 — Sections

Purpose

Fast transactional booking interface for sections.

Grid/list focused experience.

No map-first interface.

Top Area

Date selector
Filter button

Section Filters

For You
Today
This Weekend
Best Deals

Future filters:

VIP
Large Groups
Birthday Friendly
Near You

Section Grid/List

Maximum 4 visible rows/cards at a time.

Vertical scrolling enabled.

Each section card displays:

Club name
Event name
Section name
Booking fee
Minimum spend
Guest capacity
Event time
Bottle package preview

Expanded Section Details

Selecting section expands inline OR opens detail screen.

Expanded Details

Full section details
Bottle package
Guest capacity
Booking fee
Minimum spend
Arrival requirements
Event link
Promoter link
Club page link
Section map/location if available

CTA:

Book Section

Section Checkout Flow

Core Requirement

Section checkout must support:

Guest invitation management during checkout.

This enables:

Split payments
Guest management
Paid guest assignment
General guest assignment

Guest Assignment Types

Paid Guests
General Guests

Paid Guest Flow

If invited paid guest already has account:

Invitation appears in:

My Events → Current Events → Pending

Guest receives push notification.

Paid Guest — External User

If invited paid guest does not have account:

Send SMS:

“Hey! Marcus just invited you to host a section with him. Click the link to join in on the fun.”

Selecting link triggers:

Account creation
Payment flow
Event attachment

General Guest Flow

If invited general guest already has account:

Invitation appears in:

My Events → Current Events

Guest receives push notification.

General Guest — External User

If invited guest does not have account:

Send SMS:

“Hey! Marcus invited you to a section. Click the link to join the fun.”

Selecting link triggers:

Account creation
Section attachment
Event attachment

Split Payment Logic

Paid guests can:

Accept payment responsibility
Pay assigned amount directly through app

Booking owner can:

Track paid/unpaid guests
Modify assignments
Remove guests
Resend invitations

Tab 3 — My Events

Purpose

Operational hub for all customer-attached nightlife experiences.

This is not a discovery tab.

Top Toggle

Current Events
Past Events

Current Events Logic

Customer appears attached if they:

RSVP'd
Joined guest list
Purchased GA/digital pass
Booked section
Accepted section invite

Current Event Card

Each event card displays:

Event cover image
Event name
Date and time
Location
Status badge
Front-facing QR code
PIN code

Priority Requirement

QR code and PIN code must remain highly visible and immediately accessible.

This is the primary operational functionality for customers during nightlife usage.

Status Badge Examples

RSVP Confirmed
GA Pass Purchased
Section Booked
Section Invite Accepted

Event Details

Selecting event card shows:

Large QR code
PIN code
GA pass details
Section details
Arrival instructions
Guest list status
Promoter contact
Club info
Share options

Past Events

Displays:

Event name
Date
Location
Status

Future optional functionality:

Memories
Attendance history
Rewards

Photos

Tab 4 — Friends

Purpose

Lightweight nightlife social graph.

Not a traditional social media feed.

Section 1 — Friend Group

Subtitle:

See where your friends are going

Logic:

Show events attended by followed users or mutuals.

Events with more friends attending rank higher.

Friend Event Card

Displays:

Event name

Friend profile bubbles

Number of friends attending

Date/time

CTA to event

Example:

5 friends going tonight

Section 2 — My Social Circle

Subtitle:

See what your circle has going on

Displays activity from:

Followed clubs

Followed promoters

Followed promotion groups

Content includes:

Upcoming events

Guest lists

Section availability

Hosted nightlife experiences

Section 3 — Suggested Friends

Minimal horizontal cards displaying:

Profile photo

Name / handle

Follow button

Suggested users prioritize:

Same city

Similar nightlife attendance behavior

Mutual follows

Tab 5 — Profile

Purpose

Identity, settings, and account management.

Profile Header

Displays:

Profile picture
Name / handle
Bio
Instagram hyperlink

Stats:

Events attended
Followers
Following

Profile Tools

Saved events
Saved sections
Payment methods
Notification preferences
Privacy settings
Connected accounts
Support
Logout

Connected Accounts

Connected accounts allow customers to:

Link Instagram
Link Apple account
Link Google account

Purpose:

Faster login
Social verification

Profile syncing
Authentication recovery

Lock Screen / Home Screen Event Widget

Purpose

Provide frictionless access to nightlife passes and event information.

Primary focus:

Fast QR code access.

Widget Trigger Conditions

Widget generates automatically when customer:

Purchases GA pass
Joins guest list
Books section
Accepts section invite

Widget Activation Timing

Widget automatically appears:

2 hours before event or section start time.

If customer has multiple active events:

Prioritize nearest upcoming event.

Widget Content

Event name
Event/section start time
Venue name
Access type
OpenClub logo

Access type examples:

GA Pass
Guest List
Section Booked
Section Invite

Widget Interface

Primary CTA only:

Show Pass

No additional CTA buttons on widget.

Widget Interaction Logic

Selecting:

Show Pass

Immediately opens:

QR code / pass screen.

Selecting any other part of widget opens:

Event detail screen.

Widget QR Logic

If customer has:

GA pass → show GA QR code

Section booking → show section access QR

Section invite → show section invite access QR

Guest list → show guest list access QR/pass if applicable

Widget Expiration

Widget expires when:

Event ends

Pass scanned/completed

Section completed

Event cancelled

Expired events move into:

My Events → Past Events

[illegible]
