

Door personnel onboarding

1. Entry Screen (Universal) • Email / Phone login • OTP verification (preferred over password for speed) • “Continue with Apple / Google” (optional but useful for customers, not critical for staff) Keep identical across all roles. Screen: • “You’re the first point of contact” • Subtext: <i>Scan guests in. Control entry. Keep the line moving.</i>	
2. Role Detection (Critical Fork Point) After login, system checks: • Assigned roles (can be multi-role) • Active event/venue assignment (if applicable)	
Door Personnel Flow (Post-Login Divergence) 3. Assignment Check (Hard Gate) Unlike other roles, door personnel MUST be tied to: • Venue • Event (or default “club night”) Screen: “Where are you working tonight?” Options: • Auto-assigned event (ideal) • Manual select (fallback)	

4. Instant Mode Activation The second assignment is confirmed: → NO dashboard → NO menus → Drop straight into scanner	
Home = Scanner (Always) No tabs. No navigation. Top Bar: • Venue Name • Event Name • Status: "Scanner Active" Core Screen • Full-screen camera scanner • Instant scan detection • First option - Scanner auto-open • Second option/fallback - PIN

- Issue

Guardrail:

After 3 failed attempts → prompt:

Search guest or notify host

4. Search Guest

Inputs

- Name
 - Phone Number
 - Promoter
 - Reservation Name
-

Result Card

Display:

- Guest Name
 - Promoter / Reservation
 - Status
-

Not Checked In

Auto-Admit

Already Checked In

Apply same re-entry logic:

- 15 min → auto re-entry
 - <15 min → flagged, manual confirm
-

Not Found

Display:

No matching guest found

Actions:

- Try Again
 - Issue
-

5. Issue Flow

Trigger

Used when:

- Guest mismatch
 - System confusion
 - Edge cases
-

Options

- Guest not found
- QR not scanning
- Duplicate concern
- Wrong event
- Section claim issue
- Promoter claim issue

- App/system issue
 - Other
-

Submit

Sends:

- Issue type
- Door personnel
- Event
- Venue
- Timestamp
- Guest context (if available)

Then:

Return to scanner

6. Home Tab (Event Selection)

Purpose

Simple, lightweight event selection.

Layout

Today (Primary)

Vertical event cards:

Each card:

- Event Name
- Venue
- Time
- Status (Live / Upcoming)

CTA:

Start Scanner

Tomorrow / Upcoming

Same format, lower priority.

Rules

- Only show events where door personnel is assigned (toggled ON)
 - Tapping event:
 - Sets active event
 - Switches to Scanner tab
-

Behavior

Single Event

- Auto-bound to scanner
- Minimal Home usage

Multiple Events

- Home enables quick switching
-

7. Account Tab

Minimal only:

- Name
 - Role: Door Personnel
 - Assigned Venue / Promotion Group
 - Camera Permissions
 - Report Issue
 - Log Out
-

8. Core UX Rules (Locked)

1. Scanner Auto-Default

App always opens to Scanner

2. Event-Bound Scanner

Scanner only active when:

- Event is active
 - OR within club operating hours
-

3. Speed Priority

Target:

- 200–500 scans per night
 - ~1.5–2.5 seconds per guest
-

4. Auto-Admit System

-  Valid → Auto admit
 -  >15 min → Auto admit
 -  <15 min → Manual confirm
 -  Invalid → Block
-

5. One-Tap Recovery

All failure paths lead to:

- Search

• Input Code • Issue Within 1 tap	
6. Zero Friction Interface • No dashboards • No analytics • No unnecessary decisions
